Uttaratantra 65: Rules of Interpretation

Literature

Meulenbeld offered an annotated overview of this chapter and a bibliography of earlier scholarship to 2002.³⁸⁰ Earlier explorations of this topic include Nārāyaṇa 1949; Dasgupta 1952; Oberhammer 1967–68; Muthuswami 1976; Lele 1981; Scharfe 1993; Mejor 2000; A. Singh 2003. Manevskaia (2008) gave examples of the use of tantrayuktis in Buddhist commentarial literature.

Terminology

Characteristics of the Manuscript Transmission

Translation

- 1 Now we shall explain the chapter called, "the enunciation of the logical methods of the system (*tantrayukti*)."
- 3 There are thirty-two logical methods of the system. They are as follows:
 - topic (adhikaraṇa)
 - construing (yoga)
 - word meaning (padārtha)
 - premise (hetvartha)
 - mention (samuddeśa)

380 HIML: IA, 331.

- description (*nirdeśa*)
- prescription (*upadeśa*)
- statement of reason (apadeśa)
- indication (*pradeśa*)
- prediction (atideśa)
- exception (*apavarga*)
- ellipis (vākyaśesa)
- implication (arthāpatti)
- contraposition (*viparyaya*)
- recontextualization (*prasanga*)
- invariable statement (*ekānta*)
- variable statement (*anekānta*)
- objection (*pūrvapakṣa*)
- determination (*nirṇaya*)
- consent (anumata)
- itemization (vidhāna)
- future reference (anāgatāpekṣaṇa)
- past reference (atikrāntāpekṣaṇa)
- (samśaya)
- (vyākhyāna)
- (svasamjñā)
- (nirvacana)
- (nidarśana)
- (niyoga)
- (vikalpa)
- (samuccaya)
- (ūhya)
- 4 It is said about this, "what is the purpose of these methods?" The answer is, "construing sentences and construing meanings".³⁸¹
- 5-6 There are two verses about this:

The logical methods of the system prohibit statements employed by people who do not speak the truth. They also bring about the validity of one's own statements. And they also clarify meanings that

³⁸¹ Dalhaṇa on 6.65.4 (Su 1938: 815) explained "construing a sentence" as "connecting up a sentence that is not connected," and "construing a meaning" as "clarifying or making appropriate a meaning that is implied or inppropriate."

Translation 135

are stated back to front, that are implicit, unclear and any that are partially stated.

8 Among them, "topic (*adhikaraṇa*)" refers to the object, with reference to which statements are made, such as flavour (*rasa*) or humour (*doṣa*).³⁸²

"Construing (*yoga*)" is that by which a sentence is construed, as when words that are in a reversed order, whether placed close or apart, have their meanings unified.

Sesame oil he should drink, with heart-leaved moonseed, neem tree, maidenhair fern, Indrajao, and long pepper

that is cooked with heart-leaf sida and country mallow, and deodar, always for a benefit in the case of the disease goitre.

In this verse, one ought to say, first, "one should drink cooked...." However, the word "cooked" is used in the second line.³⁸³ Unifying the meanings of words in this way, even though they are far apart, is construing.

- The meaning that is conveyed in an aphorism (*sūtra*) or a word is called word meaning (*padārtha*). In other words, word meaning is the meaning of one or more words. Word meanings are unlimited.

 Where two or three meanings such as 'fat', 'sweat' or 'anointment' appear to be possible, one should consider the meaning which is valid
 - pear to be possible, one should consider the meaning which is valid through semantic linkage with prior and subsequent elements. For example, comprehension is doubtful when it is said that "We are going to explain the chapter on the origin of Veda" concerning that the origin of which Veda is to be stated. *Sāmaveda* and so on are the Vedas. With regard to prior and subsequent elements, the roots *vind* and *vid* have the same meaning. Later a word appears that clarifies that he wants to talk about the origin of *Āyurveda*. Hence, it (āyurveda) is the word meaning.
- The statement that serves as proof of an argument is the premise (*hetvartha*). For example, as a lump of earth is moist by water, the same way a wound becomes moist by substances like milk with black grams and so on.

³⁸² The idea here is that "rasa" may be the topic of a chapter, and statements in that chapter are all understood to be about that topic

³⁸³ The Nepalese version reads द्वितीये पादे which would properly mean the second quarter of the first line; the vulgate reads "third quarter" which seems more correct.

- A brief statement is called mention (*samuddeśa*), such as pain-causing agent (*śalya*).
- 13 A detailed statement is description (*nirdeśa*). For example, the paincausing agents are endogenous or exogenous.
- Prescription (*upadeśa*) refers to statements like "it should be this way". For example, one should not stay awake at night; you should not sleep during daytime.
- prescription (*upadeśa*) refers to statements like "this happens because of this". For example, in the sentence "Phlegm increases by sweet substances", the reason is stated.
- Substantiation of the subject matter through past evidence is indication (*pradeśa*). For example, he removed the pain-causing substance from Devadatta so he can do it from Yajñadatta.
- Substantiation of the subject matter through future event is prediction (*atideśa*). For example, if his wind goes up he would get colic by that.
- A deviation after generalization is exception (*apavarga*). For example, those afflicted by poison should not go through sudorific treatment other than the cases of poisoning by urinary worms.
- Ellipsis (*vākyaśeṣa*) refers to an unstated word that completes a sentence. For example, despite not mentioning the word 'person', when mentioning someone as 'the one having a head, hands, feet, flanks, and abdomen,' it's apparent that the reference is to a person.
- arthāpatti (*Implication*) refers to an unstated idea that becomes evident through context. For example, when one said, "We will eat rice" it becomes evident from the context that he did not wish to drink gruel.
- When there is the reversal of it it is contraposition (*viparyaya*). For example, when it is said, "Weak, dyspneic, and fearful people are difficult to treat," the converse holds true: "Those who are strong and so on are easily treatable."
- Recontextualization (*prasanga*) refers to a concept common to another section. For example, a concept belonging to another section is brought up by mentioning it repeatedly throughout.
- 23 Invariable statement (*ekānta*) is one that is stated with certainty. For example, turpeth causes purgation; emetic nut induces vomiting.
- Variable statement (*anekānta*) is one that is true in one way in some cases and in another way elsewhere. For example, Some teachers identify the main element as substance, others as fluid, some as semen, and some as digestion.

Translation 137

That which is mentioned undoubtedly is objection (*pūrvapakṣa*). (???) For example, how are the four types of diabetes caused by wind inclurable?

- Its answer is determination. For example, afficting the body and trickling downwards, it creates urine mixed with fat, fatty tissues, and marrow. Thus, those caused by wind are incurable.
- 28 Consent (*anumata*) refers to others' opinion that is not rejected. For example, when the assertor says that there are six flavours and that somehow gets accepted with affirmation, it is termed consent.
- 29 Itemization (*vidhāna*) refers to sequentially ordered statements within a chapter. For example, the eleven lethal points of thigh are mentioned sequentially in a chapter.
- A statement like "Thus will be stated" is future reference (anāgatāpe-kṣaṇa) such as when one says in the Sūtrasthāna, "I will mention it in the book of "Cikitsā".
- A statement like "Thus has been stated" is past reference (atikrāntāpe-kṣaṇa) such as when one says in the Cikitsāsthāna, "As mentioned in the Sūtrasthāna...".

See ADPS: 387, AVS: 1, 281, NK: 1, #363:77,93 Holostemma creeper $(j\bar{\imath}vant\bar{\imath}) \rightarrow$ sūryavallī? Holostemma ada-kodien, Schultes. See ADPS: 195, AVS: 3, 167, 169, NK: 1, #1242: 177 honey (ksaudra) Eight varieties of honey are described in the SS (NK: 2, Appendix 192). Ksaudra is the product of a small bee of tawny colour, called kṣudra: 79 horned pondweed (śaivāla) also śaivāla, śevāra. Zannichellia palustris L. The uncertainties of this identification are discussed by T. B. Singh and Chunekar (GVDB: 409). Sometimes identified with scutch grass (*dūrvā*) (GVDB: 409).

Identified as Ceratophyllum demersum Linn. ("hornwort") by AVS: 2, 56–57x:

hornwort (jalaśūka) $\rightarrow jalanīlikā$. Ceratophyllum demersum, L. See AVS: 2, 56, IGP: 232. T. B. Singh and Chunekar (GVDB: 166) suggest horned pondweed. Dalhana noted on 1.16.19 (Su 1938: 79) that some people interpret it as a poisonous, hairy, air-breathing, underwater creature: 41 Indian barberry $(a\tilde{n}jana) \rightarrow ras\bar{a}\tilde{n}jana$, dāruharidrā. Berberis aristata, DC. Dymock: 1, 65, NK: 1, #335, GJM1: 562, IGP: 141: 42, 78, 174 Indian barberry (dāruharidrā) Berberis aristata, DC. See Dymock: 1, 65, NK: 1, #685, GJM1: 562, IGP 141: 93, 94 Indian barberry $(k\bar{a}l\bar{\imath}yaka) \rightarrow d\bar{a}ruharidr\bar{a}$, añjana. Berberis aristata, DC. See Dymock: 1, 65, NK: 1, #685, GJM1: 562, IGP: 141: 76 Indian ipecac (payasyā) Uncertain. Possibly Tylophora indica (Burm.f.) Merr. Perhaps a synonym of panacea twiner, giant potato, purple roscoea, and plants like asthma plant and Gulf sandmat (GVDB: 237-238). Also "curds" when not a plant: 41, 177 Indian kudzu (*vidārī*) → *payasyā*. Pueraria tuberosa (Willd.) DC. See ADPS: 510, AVS: 1, 792 f, AVS: 4, 391; not Dymock: 1, 424 f. See GJM2: 444, 451, AVS: 1, 187, but AVS: 3, 1719 = Ipmoea mauritiana, Jacq: 41 Indian madder (mañjisthā) Rubia cordifolia, L. See IGP, Chopra: 215, GVDB: 289: 37, 94 Indian mottled eel (varmimatsya) Almost certainly the mottled eel. MW: 962c noted that the varmi fish "is commonly called vāmi." The "vam fish," or "বান মাছ (bān māch)" in Bengal, is a marine and freshwater eel, Anguilla bengalensis.

It is the most common eel in Indian inland waters and a prized food fish

(Froese and Pauly 2022). However,

176, 178

some NIA languages identify the "vam" fish with the Indian Pike Conger, Congresox talabonides (Bleeker) (Talwar and Kacker 1984: 235, 236): 21 Indian mustard (sarṣapa) Brassica juncea, Czern. & Coss. See AVS: 1, 301, NK: 1, #378:24 Indian sarsaparilla $(s\bar{a}riv\bar{a}) \rightarrow anant\bar{a}$. Hemidesmus indicus, (L.) R. Br. ADPS: 434, AVS: 3, 141-5, NK: 1, #1210; and black creeper, pālindī. Ichnocarpus frutescens, (L.) R.Br. or Cryptolepis buchanani, Roemer & Schultes AVS: 3, 141, 3.145, 3.203, NK: 1, #1283, 1210, ADPS: 434: 93, 94, 175 Indian snakeroot (sarpagandhā) Rauvolfia serpentina, (L.) Benth. ex Kurz. See NK: 1, #2099, ADPS: 439, GVDB: 425; cf. SS 5.5.76–78: 179 Indrajao (vrksaka) \rightarrow indrayava, indrabīja, kalinga, and kutaja. Holarrhena antidysenterica Wall. subject-verb-object	49
Don't put guesses in the main text. Footnote them	49
Cf. Arthaśāstra 1.21.8	72
I'm still unhappy about this verse	75
Mention this in the introduction as an example of the scribe know-	
ing the vulgate.	75
fn about sadyas+	75
Bear's bile instead of deer's bile	76
punarṇṇavā in the N & K MSS	77
śrita for śṛta	77
explain more	77
Medical difference from Sharma	78
example where the vulgate clarifies that these should be used separately; appears to be a gloss inserted into the vulgate text	78
The two uses of prāpta are hard to translate. prāptā $h \rightarrow k$ ķipram is	•
an example of the vulgate banalizing the Sanskrit text to make	
sense of a difficult passage	78
$\sqrt{\text{vyadh not }\sqrt{\text{vedh (also elsewhere and for the ears)}}}$, causative	_
optative	78
-> ativișa	88
Look up the ca. reference.	88
Come back to the issue of "kalpa". Look up passages in the Kośa.	95
write footnote: don't repeat ativiṣā; vulgate similar to H	99
material corresponds to SS.1.45.205ab, where it describes how al-	
cohol affects the body.	102

Or "There are 20 phaṇins and 6 maṇḍalins. The same number are
known. There are 13 Rājīmants." Or even, "there are 20 Phaṇins
and six of them are Maṇḍalins." Are phaṇins really the same as
darvīkaras?
